

# jet.fuel Ink Solutions

*Inks for Every Application*

**jet.fuel Ink Solutions:**

*Inks for every application.*

### **Printing accomplished.**

No two materials are alike. They often require very different inks in order to produce the quality and clarity that is demanded. Whether printing on matte stocks or glossy finishes, inc.jet provides inks that dry quickly, are water resistant, and adhere to the most difficult substances. And since inc.jet uses HP thermal inkjet technology, it offers pigmented as well as dye and solvent-based inks, providing you with even more printing possibilities.

### **Options to suit every need.**

If black ink dominates your print jobs then our specially formulated jet.fuels give you a wide range of options, each one designed for specific coats and stocks. For those projects that require color, we carry over 14 stock colors, as well as offering custom Pantone Color Matching.

### **Driving ink technologies.**

inc.jet doesn't stop with its already extensive portfolio of inks. Always looking for newer and better ways to use its inks, inc.jet provides its customers with solutions to today's and tomorrow's printing needs. By working in collaboration with HP, inc.jet has the advantage to always be at the forefront of new technology, ensuring our customer's future development and success.

## Universal Black

A truly versatile ink, Universal Black, a combination of both dye and pigment, is ideal for larger print jobs and designed to work on both coated and non-coated stocks.

- Dye & Pigment Based
- Coated/Non-Coated Stocks
- Available in Cartridges (42ml) or Bulk Supply (800ml)

## Pronto Black

With a quick dry time, this ink is ideal for offset paper. It works best with matte stocks, creating rich, dense results.

- Pigment Based
- Matte Stocks
- Available in Cartridge (42ml)

## True Flex

This UV Curable ink is intended for non-absorbent substrates-this ink adheres well to plastics, film or varnishes. A UV Curing system is required.

- Pigment Based
- Non-absorbent substrates
- Available in Cartridges (42ml)
- Also Available with Extended Decap Formula

## Overcoat

Perfect for coated substrates, this is available in 14 standard colors and also in any PMS color.

- Dye Based
- Coated Stock
- 14 Standard Colors or PMS
- Available in Cartridges (42ml) or Bulk Supply (800ml)
- Also Available in an Extended Decap Formulation

## Overcoat Black Delta

With the same applicability and adherence as Overcoat Black, Delta has a longer decap time allowing for increased time between print jobs.

## Supercoat

Created for super glossy stocks, Supercoat has a quick dry time and resists smearing.

- Dye Based
- Super Glossy Stocks
- Available in Cartridges (42ml) or Bulk Supply (800ml)

## Jet Black

Jet.Black is designed with corrugated, offset/uncoated paper in mind. The darkest black offered, it has an exceptionally quick dry time. This dye based ink is ideal for adding variable data to preprinted forms.

- Dye Based
- Offset/Uncoated Paper, Corrugate
- Available in Cartridges (42ml) or Bulk Supply (800ml)
- Also Available in an Extended Decap Formulation

## Jet Black Delta

Still the same rich, dark black as Jet.Black, but with an improved decap time.

## G-Force

Perfect for aqueous acrylic media, G-Force is designed to print fixed, or variable data on primary packaging and glossy substrates.

- Solvent & Pigment Based
- Aqueous Acrylic/Glossy Substrates
- Available in Cartridges (42ml)
- Requires IR Drier

## Basic Black

Recommended for 2D barcodes on standard bond paper, Basic Black leaves a crisp, detailed print job.

- Pigment Based
- Matte/Standard Bond Paper
- Available in Cartridges (42ml) and Bulk Supply (800ml)
- Also Available in an Extended Decap Formulation

## Basic Black Delta

This Delta version of Basic Black has a better decap time for increased usability between jobs.

## Stabilizer Black

Specifically produced for more stubborn substrates, Stabilizer Black is designed to print on Tyvek. It keeps consistent coloring and will not wash or fade out.

- Pigment & Resin Based
- Tyvek
- Available in Cartridges (42ml)

## Supersonic Black

Great adhesion properties, makes this ink ideal for printing on stubborn substances such as PVC.

- Pigment Based
- Aqueous Stocks, PVC
- Available in Cartridges (42ml) and Bulk Ink Supply (800ml)
- Available in Blue and Red

## Tracer Black

For aqueous and clay coated boxes, this light black colored ink dries almost instantly-perfect when dry time is a key requirement.

- Dye & Acid Based
- Coated Boxes
- Available in Cartridges (42ml)
- Available only in Light Black

# jet.fuel Ink Solutions: *Matching inks to needs.*

## Anticipating future ink needs.

Print requirements change constantly and consequently, so must the inks. With the backing of HP and other partners, inc.jet is continuously striving to create the widest range of inks for every possible substrate, while providing the darkest, fastest drying blacks, and the boldest, most vibrant colors available.

## Cartridges & bulk supply.

Dependant on application and consumption, inc.jet offers many of its jet.fuel inks in both cartridge and bulk supply form—42ml or 800ml. And, always focused on providing the finest quality inks with the highest reliability print heads, only new cartridges and bulk inks are supplied—no refills are ever used.

## Color options.

When color is required, inc.jet has the solution! With a wide variety of colored inks, for an array of substrates—14 stock colors as well as custom Pantone Color Matching (PMS)—colored print comes out bold, clear, and defined.

Colors are reproduced as close to actual colors as printing technology will allow. Actual colors may vary from those shown here.
